ABOUT ME

Marine Engineer Officer currently serving as 4th Engineer aboard LNG-powered vessels, with hands-on experience operating and maintaining MAN ME-GA dual-fuel propulsion systems and critical shipboard machinery. Experienced in PMS, fault diagnosis, planned maintenance, auxiliary systems and technical troubleshooting. French/EU national holding OICEW certification and advanced LNG/IGF training, seeking to transition into the yachting industry.

WORK EXPERIENCE

4TH ENGINEER

May 2026 - Present

Orion Global transport France, LNG'C ID'ASAH

- Hands-on and autonomous engineering role covering propulsion, power generation and auxiliary systems, with responsibility for maintenance, troubleshooting and onboard task coordination.
- Operated, maintained and troubleshot MAN ME-GA dual-fuel engines, diesel generators and major auxiliary systems, including boilers, production and management of fresh water, sewage treatment, compressed-air and HVAC.
- Planned and executed PMS and preventive maintenance, ensuring machinery reliability, availability and operational readiness.
- Worked independently while coordinating and supervising crew and contractors, allocating tasks and overseeing safe and efficient execution.
- Diagnosed machinery failures, performed root-cause analysis and implemented corrective actions.
- Coordinated with Chief Engineer, OEMs, technical departments and contractors, while managing spare parts and maintaining accurate technical documentation.

CADET MARINE ENGINEER

Jul 2025 - May 2026

Orion global transport france

- Engine-room watchkeeping and machinery rounds.
- PMS and planned maintenance support.
- Fault finding and corrective maintenance.

CADET MARINE ENGINEER

Jun 2024 - Aug 2024

LD TIDE, La Turballe

- Served as a Marine Engineering Cadet onboard passenger Crew Transfer Vessels (CTVs), working closely with onboard engineering teams and shore-based Superintendents across daily operations, maintenance and vessel projects.
- Assisted engineering teams with machinery operation, maintenance, troubleshooting, inspections and PMS activities.
- Worked alongside shore-based Superintendents and shipyard teams, gaining exposure to technical planning, project coordination and vessel management.
- Supported and coordinated CTV dry-dock operations, including machinery inspections, maintenance planning, repairs and preparation for re-delivery.
- Conducted engine-room rounds, equipment checks and technical reporting while developing strong hands-on engineering and safety awareness.
- Developed practical experience working across shipboard operations, crew coordination, shipyard activities and shore-based technical management.

FIREFIGHTER

Jun 2021 - May 2023

Service Départemental d'Incendie et de Secours29
, Camaret-Sur-Mer And Saint Malo

- Responded effectively to emergency situations in demanding and safety critical environments, maintaining composure and operational effectiveness under pressure.
- Worked within disciplined, highly coordinated teams during fire, rescue and emergency response operations.
- Demonstrated strong situational awareness, rapid risk assessment and sound decision-making in dynamic emergency situations.
- Applied strict safety procedures and maintained high standards of personal discipline, teamwork and operational readiness.
- Demonstrated strong communication, adaptability and stress management while operating in rapidly changing and high-pressure environments.

CADET MARINE ENGINEER

Feb 2023 - Feb 2023

Brittany Ferries

Completed a one-week engine cadet placement aboard a passenger vessel as part of a program organised by the French Maritime Academy

KEY TECHNICAL EXPERTISE

MAN ME-GA Dual-fuel propulsion

genset, auxiliary machinery

planned maintenance

LNG System

Fault finding

dry-dock operations

EDUCATION

2025

ENSM, Saint Malo

Marine Engineering Degree Diploma

- Officer in Charge of an Engineering Watch
- Chief Engineer 8,000 kW

STCW 2010

- Officer in Charge of an Engineering Watch (OICEW)
- Advanced Liquified Gas Tanker
- Advanced IGF Code
- Advanced & Basic High Voltage
- Advanced Fire Fighting
- Engine-Room Resource Management (ERM)
- Bridge Resource Managment (BRM)
- Medicales Care
- Fast Rescue Boat
- Basic Safety Traingin
- Security Awareness & Designated Security Duties
- Crisis Management & Human Behaviour
- Basic Oil & Chemical Tanker
